MEMORANDUM FOR: Bo Denysyk
Deputy Assistant Secretary for
Export Administration
Department of Commerce

SUBJECT: Your Recent Memorandum Concerning the
USSR Microelectronics Case Study [] 25X1

REFERENCE: Microelectronics Case Study on USSR [] 25X1
[] 25X1

1. Thank you for your remarks concerning the Micro-electronics Case Study. I am pleased that the Scientific and Technical Intelligence Committee's working group was able to satisfy your needs in the area. The members of the working group have been informed of your comments. They worked hard on this study and they are pleased to have direct feedback from you. The Microelectronic Case Study will be published by the STIC in the near future for a wider, but still limited, circulation within government circles. I hope your colleagues find this study as useful as you have. [] 25X1

2. In your memorandum, you suggested several studies that would be useful. Unfortunately, Community resources are not presently adequate to support studies concerning [] to the same depth as USSR studies. I have asked the STIC to investigate the feasibility of doing a study concerning the transfer of numerically controlled machine tools and related equipment to the Soviet Union. The utility of this study will depend on the availability of solid information. We will advise you of the possibility of doing a study in this area. [] 25X1

3. The STIC and the TTIC are also exploring ways of identifying specific examples of Western technology used in Soviet weapons, military systems, and defense-related R&D and manufacturing facilities. This effort may result in several specific case studies of Western-USSR technology transfer that may be of interest to you. []
